***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicants' composition of matter comprising copper dispersed on a porous rare earth halide or porous rare earth oxyhalide support as well as the method for using the said porous rare earth halide or porous rare earth oxyhalide as a catalyst support is unobvious over the prior art or record. Although the prior art of record (US Pats. 2204733 and 4849393) teach compositions/catalyst systems comprising copper and rare earth halides as catalyst components, the prior art of record does not teach or suggest using porous rare earth halides or porous rare earth oxyhalides as supports for catalyst components (metals or metallic ions). Applicants have also shown, by way of comparative data on pages 14-17 of the present specification, that the presently claimed composition/catalyst system (copper dispersed on a porous rare earth halide support) allows for an increase in product yield and reduction in oxygenated by-products, when the said composition/catalyst system is used in catalytic oxychlorination reactions. All claims (1-16) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
